

Discover with confidence

Fast and reliable screening and profiling services,
with 80% of your data in <48 hours

Are you having trouble getting reliable data with a quick turnaround time? Find out what the industry leaders already know and reach out to the Invitrogen™ SelectScreen™ services team today.

Why do scientists trust the SelectScreen services team?

- **Average data delivery time is 3.8 days**—so you can get data to your medicinal chemists more quickly
- **Access data in real time**—as soon as they're available, results are yours via our secure online portal
- **Broad panel of more than 485 purified kinases**—to help you establish how selective a compound is for its intended targets
- **Over 800 validated assays**—choice of biochemical and cellular assays across multiple target classes
- **State-of-the-art compound management system**—helps ensure consistently high-quality data is delivered for every project
- **Complete Lab Information Management System (LIMS)**—helps ensure project traceability and consistency
