

Implementation support guide

PreClara Ratio (sFlt-1/PIGF)

Comprehensive support for successful adoption of the PreClara™ Ratio (sFlt-1/PIGF) for preeclampsia risk assessment in your facility

Education and support

Education is vital for driving clinical adoption and utilization of a new test. Our program will help raise awareness, enhance understanding of the test's purpose and benefits, promote evidence-based practice, and instill confidence to encourage new and continued use of novel biomarker testing for preeclampsia (PE) care.

Thermo Fisher Scientific resources

Your Medical Science Liaison (MSL) will serve as a PE biomarker expert and scientific resource guiding you and your team through implementation. Your MSL will provide education, training, and guidance to ensure a full understanding of test interpretation, clinical application, and how it can aid in PE clinical management and decision making.

Your dedicated Biomarker Specialist will serve as your primary point of contact, coordinating efforts and providing support throughout the entire process. They will work closely with you to identify areas that require continued education, specific departments to focus on, and the content to include in trainings.

With their expertise, you can ensure a seamless implementation and optimize the impact of the biomarker test in your facility.

Support along the way

Pre-implementation

Available formats

- ✓ Dinner presentation
- ✓ Grand rounds
- ✓ Lunch and learn
- ✓ Other

One or more events*

Suggested audience

Managing clinicians, such as OB-GYNs, MFMs, residents

Key topics covered

- Pathogenesis of PE relating to placental biomarkers
- Interpretation of PRAECIS clinical validation study
- Review FDA indication
- Review and learn from case studies
- Review management strategies
- Implementation best practices

Key materials/programs

- Product brochure
- Case study flyers (including example management strategy)
- Clinical education portal access

Implementation

Available formats

- ✓ Interdepartmental education
- ✓ Lunch and learn
- ✓ On-the-floor education
- ✓ Webinar presentation
- ✓ Other

One or more events*

Suggested audience

Managing clinicians, labor and delivery (L&D) nurses, lab personnel

Key topics covered

- In-depth review of BEACON clinical utility study
- Review and discuss additional case studies
- Protocol sharing from early adopter sites
- Roving Q&A at all departments

Key materials/programs

- Lab data sheet
- Real-world evidence (RWE) summaries
- Patient materials

Post-implementation

Available formats

- ✓ Grand rounds (guest speaker)
- ✓ Lunch and learn
- ✓ On-the-floor education
- ✓ On-demand webinar
- ✓ Other

One or more events*

Suggested audience

Managing clinicians, L&D nurses, lab personnel, other departments and personnel as identified (such as ED, admin, and management)

Key topics covered

- Repeat education as needed
- Health economics studies
- Continued RWE studies
- Roving Q&A at all departments

Key materials/programs

- Health economics literature
- Additional case studies
- Additional RWE summaries

*offered as needed or requested
