

Precision that evolves. Security that endures.

Thermo Scientific Watson LIMS software—trusted for bioanalysis and now enhanced through integration with advanced Red Thread analytics.

For over 20 years, Thermo Scientific™ Watson™ LIMS Software has set the standard for precision, compliance, and reliability in bioanalytical workflows. With version 7.7.2, Watson LIMS evolves—delivering stronger security, faster validation, and a foundation for the next-gen LIMS era. Watson LIMS provides enhanced functionality when used with optional Red Thread® modules—Red Thread Fit™ regression curve fitting, Red Thread Verge™ ADA cut-point analysis, and Red Thread Eval™ (coming soon) study output validation—delivering an advanced, audit-ready analytics experience.

From global pharma to agile biotech and CROs, Watson LIMS empowers scientists to work with confidence, accelerate decisions, and drive productivity—today and into the future.

Key features of Watson LIMS 7.7.2:

- **Security and stability:** Encryption, single sign-on via thermofisher.com for robust, reliable performance
- **Compliance and audit trail:** Enhanced traceability and regulatory alignment (GLP, 21 CFR Part 11)
- **Future-ready:** Foundation for modular, SaaS-based next-gen LIMS capabilities
- **Advanced analytics:** Watson LIMS version 7.7.2 works with Red Thread modules—Fit, Verge, and Eval (coming soon)—to unlock regression accuracy, defensible ADA cut points, and automated validation
