

Vector NTI® *Express*

Green Benefits

- No packaging
- Eliminates shipment of product, packaging, and manuals
- Allows decreased fuel consumption and greenhouse gas emissions from transport
- Less waste disposal

Introduction

Life Technologies is committed to designing products with the environment in mind—it's one more step toward a smaller footprint. This fact sheet provides the rationale behind the environmental claim that Vector NTI® *Express* uses less packaging material than the preceding packaging design for Vector NTI® *Advance*. In fact, Vector NTI® *Express* v1.0 Software, Vector NTI® *Express* v1.0 User's Manual & Quick Start Guide, and Vector NTI® *Express* v1.0 Install Guide + Release Notes are no longer being shipped, but are available in downloadable formats.

Environmental benefits include the elimination of packaging material and waste, and associated decreases in greenhouse gas emissions from transport.

Product Description

Vector NTI® software is a completely integrated suite of sequence analysis and design tools that help you manage, view, analyze, transform, share, and publicize diverse types of molecular biology data—all within one graphically rich analysis environment. Completely redesigned to be faster, more intuitive, and with a dedicated Mac OS® X version, Vector NTI® *Express* Software retains the core, trusted tools of Vector NTI *Advance*® Software with a brand new interface. Built on a new platform, Vector NTI® *Express* Software supports the future of bioinformatics and synthetic biology with a plug-in architecture to consistently deliver new tools and functionality.

Sustainable Packaging

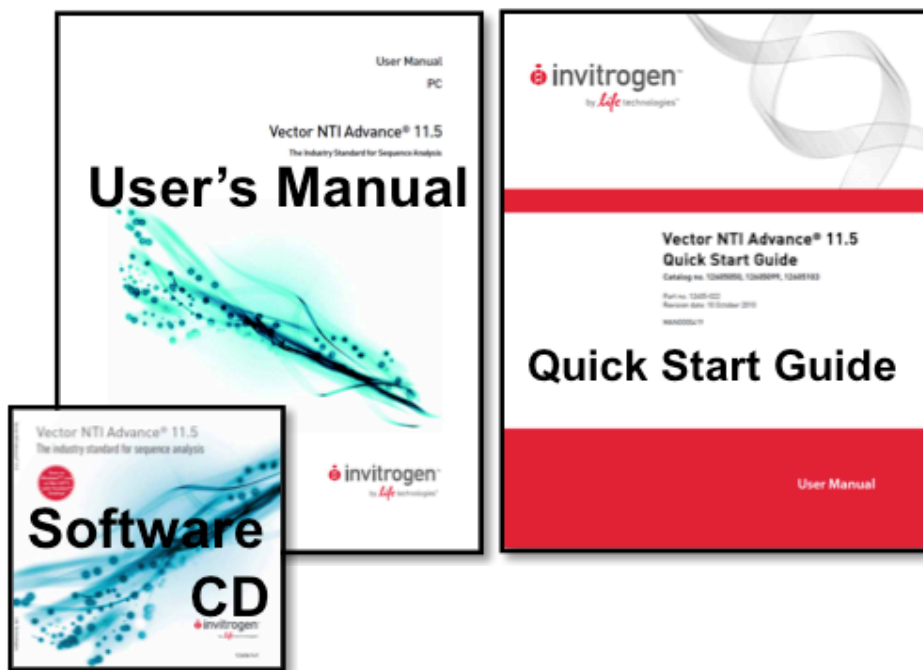

We ship nothing physical for this product. The software and associated instructional material are being provided in downloadable formats. Order confirmation e-mails contain:

- Download Links to the Software & Manuals
- A Vector NTI® *Express* License Number
- A Link To Print a User's Manual On Demand

This eliminates shipment of CD/DVDs, packaging and associated documentation (such as User's Manual & QuickStart Guide) that consists of over 800 pages and weighs over 4 pounds (see photo).*

As compared to its predecessor, we will be eliminating delivery of these types of collateral:
