

## Culture media

### Rigorous quality built into every step, confidence in every result

Culture media form an integral part of nearly every microbial detection and enumeration method carried out in the microbiology laboratory. Ensuring your culture media is fit-for-purpose is critical for accurate and easily interpreted results.

Thermo Scientific Oxoid™ Culture Media expertise and rigorous quality standards made it a preferred supplier and trusted source of dehydrated culture media for laboratories and prepared media manufacturers globally. With full traceability across manufacturing processes from raw material to dehydrated culture media formats, rest assured knowing the Thermo Scientific Oxoid™ Culture Media that reaches your benchtop will provide optimal recovery and differentiation of organisms, for greater confidence in your results.

- ✓ Combined 150 years of Culture Media expertise
- ✓ Ongoing trend analysis to ensure product quality and availability
- ✓ Full traceability from raw material to final product, to ensure quality at every step
- ✓ Manufactured in accordance with recognized quality standard, ISO 9001 and ISO13485
- ✓ Available in formats to suit your workflow, from convenience formats to standard packs
