

Coatings Technology

Library Listing – 2,507 spectra

This library and the included handbook are a highly valuable resource for the analysis of a wide variety of common coating materials. It contains spectra of polymers, resins, vehicles, pigments, extenders, acrylic monomers, radiation-curable monomers, fungicides, mildewcides, inhibitors, stabilizers, solvents and other additives. Samples were prepared as capillary films, melts on KBr, cast films on KRS-5, or KBr pellets.

The Coatings Technology Library, which is comprised of 2,507 spectra of common coating materials, was prepared by the Chicago Society of the Federation of Societies for Coatings Technology and includes the revised edition of An Infrared Spectroscopy Atlas for the Coatings Industry (1991). The atlas is the fourth edition of this FSCT publication, dealing with the use of FT-IR in coatings analysis. It includes a 2-volume hardcover book set with valuable reference information on spectroscopy theory, analytical instrumentation, sampling accessories, sample preparation, spectral interpretation and quantitative analysis.

Note: Members of the Federation of Societies for Coatings Technology qualify for a 10% discount when purchasing this library. Please be sure to provide your member number when ordering.

1361	V-9117 Deep Tan	964	Vinyl Acetate
1395	V-9118 Bright Golden Yellow	525	Vinyl Acetate Homopolymer
1362	V-9119 Tan	526	Vinyl Butyral Homopolymer
1363	V-9120 Buff	981	Vinyl Caprolactam
1396	V-9140 Bright Gold Yellow	527	Vinyl Chloride Homopolymer
1364	V-9142 Iron Free Brown	971	Vinyl Cyclohexyl Ether
1397	V-9150 Bright Gold Yellow	969	Vinyl Isobutyl Ether
1365	V-9165 Buff	528	Vinyl Pyrrolidone Homopolymer
1366	V-9171 Dark Brown	965	Vinyl Versatate
1367	V-9186 Chestnut Brown	2146	Viscasil 5000
1335	V-9229 Blue	466	Vitel PE-200
1398	V-9400 Yellow	467	Vitel VPE-222F
